MONROVIA RESIDENT, Second house by Virginia Marco

Diane, De De, Richard and I arrived to the second house in Monrovia, the family was There.

We presided to investigate, first the second floor, there I saw a female ghost. She was obesity due to physical illness, her face was moon shape. She had salt and pepper hair color. She was dress with a stripe skirt and an old white color blouse. Her name was Rosa Maria or Maria Rosa. She said angrily "Things are not the way suppose to be" She had a strong voice and she was mad with her family. I also saw a child ghost, a shy Little girl seven years of age, she looks as an Indian or Palestinian origin. The child ghost has a dress straight dark gray color, her hair is long, a very beautiful girl.

We proceed to go down stairs into the room where I saw the child ghost entering from the ceiling, that room belongs to the daughter of the family, she is three years of age and the family confirmed that she speaks with an imaginary friend. The child ghost said that the little girl needs her company.

In the next room, I saw a picture of the female ghost, she was the family grandmother, The family said that the daughter of her was buried in California and the mother was buried in Nicaragua; that's why the grandmother was mad at the family, because her daughter was not buried with her.

Due to a ghost taking matter of a family situation, means a ghost is earth bound, Because in the other side nothing matters anymore everything is love.

With the family consent we send both ghost to the light of god.
