

MARCH/2002

QUEEN MARY SHIP INVESTIGATION by Virginia Marco Psychic Medium

During the tour, while we were passing the commercial shops, I saw ghostly eyes looking at us, the tour brought us to the men only room, there I saw ghostly faces printed on the walls, then, we proceeded to the third class residency room, were in the hallway I saw an enactment of a murder. A man was stabbing a woman and then he dragged her body to one of the rooms. As we proceeded to leave the murder scene, a few hallways past, I saw two ghostly men. One of the men is call Miguel de la Fuente and the other is called Javier.

In the swimming pool room, I saw a little girl playing by herself by the entrance hallway of the swimming pool. Her name is Mary (Marylyn), with brown hair and a brown dress to her knees with no shoes and with her bare footprints printed on the floor where she was playing.

Under the stairs, in the pool room, there is a small cavity (hole) make of metal and there I saw two ghostly men, the first man was positioned as through being thrown to the wall, his upper body and head violently colliding against the wall and died. The second man hit his head against the wall and broke his neck and died.

They both want peace.

In front of the swimming pool there is a large glass, the tour guide said and the others working at the Queen Mary ship believe it is a portal to an another dimension but what I saw was that in the past there use to be a door and behind the glass there is a room and people was coming out of that room.

In the boiler room, I saw that there use to be a lot of oil and I saw only one male ghost that fell and drown in that oil.

In the ballroom, I saw a female ghost wearing a long white gaunt walking around and trying to hide from us.

We were walking down the first class room hallway where we found a room opened. This room was reserved for the very rich passengers. There I saw and pointed out to my colleagues the ghost sitting on a sofa with physical noticeable imprints, that my colleagues could see the heavy pressure on the sofa. The female ghost was old, well-dressed and very discipline. We found out later that Queen Elizabeth the first was in that room.

In the engine room, I saw two ghosts, one was a young man that died very dramatic, the other, a red hair Irish man name William, a heavy set body and very aggressive.

At the top deck, there is an exhibition of officer room and there I saw a ghost of an officer which all the things in the room were his. He is still attach to his belongs.

My conclusion is that the Queen Mary ship is very haunted due to the many dramatic events that occurred on that ship.
