

BECKERFIELD Residents by Virginia Marco 9114/2002

Upon Diane and my arrival to the resident, we were greeted at the front door by the man of the House. As we were walking towards one of the three bedrooms, I saw a male ghost walking with us, he entered directly to one of the bedroom that belongs to the 17 years old son. The male ghost was tall, a bald headed with a little white hair on each side of his head, and his name was Javier, he said with firm feeling "I like this family". The family couldn't believe it because they thought that the ghost was their Grandfather. I told them those family members that cross over from the spiritual world, don't scared us they protect us.

Usually ghost do thing that are scary to us, a ghost may look evil, but in reality with this ghost Javier, he was a good man.

The family asked for the ghost (Javier) to be sending to the light of God to find peace. We did so, satisfactorily! Like always.

Meanwhile, the man of the house asked Diane if we could go to his mother's house because she has a similar situation at her residence; so we went, and at that particular house we found another Male ghost, he was a short and a very serious ghost with dark brown hair and he had a moustache and then the ghost show me that he shaved off. His name sound like Steve, also the mother thought that he was her husband, but the description was similar of her cousin. The lady of the house wanted the ghost to stay. So be it!
